

CAREERS IN CARDIOLOGY

Supplies Needed:

- Careers in Cardiology Matching Cards

Say:

Cardiology is a branch of medicine that specializes in diagnosing and treating diseases of the heart, blood vessels, and circulatory systems. These diseases include coronary artery disease, heart rhythm problems, and heart failure.

Do:

Lay out the Careers in Cardiology Cards and have them match each career with the correct description or pass out the cards to participants and have them find their match - profession to description.

Reflect:

Share any career they may have learned about for the first time.

Developed in partnership with ISU Extension SWITCH Program to establish fundamental knowledge of heart function and heart disease prevention.
